

MITRE ATT&CK Coverage Assessment

Test Assessment

Methodology: coverage is computed deterministically against the pinned MITRE ATT&CK v19.1 dataset; techniques impossible in this environment (or excluded by the customer) leave the denominator as “not applicable”. A technique counts as covered when at least one enabled rule maps to it with qualifying confidence. This assessment scores detection *presence*, not rule efficacy.

Executive summary

This assessment measures detection coverage against MITRE ATT&CK v19.1 for a Healthcare organization. The results are low. Of 908 applicable techniques, 20 are fully covered and 9 are partially covered. Strict coverage is 2.2% and weighted coverage is 2.7%. 879 techniques have no detection at all. Coverage is thin across all three domains: enterprise at 2.3% strict, ICS at 2.1%, and mobile at 1.6%. The most urgent finding is that many top-priority gaps can be closed quickly. Fifteen tier 1 and tier 2 techniques are flagged as short-feasibility, meaning the required log sources are already onboarded. Windows Event Logs alone covers the telemetry needs for most of these gaps. Several gaps are directly relevant to Healthcare and known threat groups that target the sector, including FIN7 and Lazarus Group. The roadmap is heavily weighted toward short-term work: 789 techniques are feasible now, 7 require mid-term effort, and 92 need long-term investment. 47 techniques were marked not applicable. The immediate priority is to build detections for the techniques where telemetry already exists but no alert has been written.

Matrix	Strict	Weighted	Covered
ICS / OT	2.1%	2.1%	2/97
Mobile	1.6%	1.6%	2/124
Enterprise	2.3%	3.0%	16/687

Top 5 gaps

- **T1027** Obfuscated Files or Information — Write detections for obfuscated files using Windows Event Logs already onboarded. Focus on encoded commands, packed binaries, and script obfuscation patterns relevant to Lazarus Group activity.
- **T1486** Data Encrypted for Impact — Build a detection for mass file encryption activity using AWS CloudTrail. This is ransomware behavior directly relevant to Healthcare and FIN7 targeting. Alert on sudden spikes in S3 object encryption or deletion events.
- **T1021.001** Remote Desktop Protocol — This technique is partially covered. Close the remaining gap by writing detections for anomalous RDP sessions in Windows Event Logs, including off-hours access, new source IPs, and sessions from unexpected geographies relevant to Healthcare environments.
- **T1059.003** Windows Command Shell — Write detections for suspicious Windows command shell execution using Windows Event Logs. Focus on rare command lines, encoded payloads, and shell processes spawned by unusual parent applications.
- **T1112** Modify Registry — Build detections for registry modifications using Windows Event Logs. Alert on changes to persistence-related keys, security-relevant settings, and keys associated with defense evasion.

Roadmap at a glance: Short term (0–3 mo): 789 · Mid term (3–9 mo): 7 · Long term (9–18 mo): 92

Rules analyzed: 30 (15 customer-tagged, 4 AI-tagged, 0 unmapped, 1 invalid tags)

Gap register (888)

#	Technique	Priority	Feasibility	State	Recommendation
1	T1027 Obfuscated Files or Information	P1	Short term (0–3 mo)	Not covered	Write detections for obfuscated files using Windows Event Logs already onboarded. Focus on encoded commands, packed binaries, and script obfuscation patterns relevant to Lazarus Group activity.
2	T1486 Data Encrypted for Impact	P1	Short term (0–3 mo)	Not covered	Build a detection for mass file encryption activity using AWS CloudTrail. This is ransomware behavior directly relevant to Healthcare and FIN7 targeting. Alert on sudden spikes in S3 object encryption or deletion events.
3	T1021.001 Remote Desktop Protocol	P1	Short term (0–3 mo)	Partial	This technique is partially covered. Close the remaining gap by writing detections for anomalous RDP sessions in Windows Event Logs, including off-hours access, new source IPs, and sessions from unexpected geographies relevant to Healthcare environments.
4	T1059.003 Windows Command Shell	P1	Short term (0–3 mo)	Not covered	Write detections for suspicious Windows command shell execution using Windows Event Logs. Focus on rare command lines, encoded payloads, and shell processes spawned by unusual parent applications.
5	T1112 Modify Registry	P1	Short term (0–3 mo)	Not covered	Build detections for registry modifications using Windows Event Logs. Alert on changes to persistence-related keys, security-relevant settings, and keys associated with defense evasion.
6	T1055 Process Injection	P1	Short term (0–3 mo)	Not covered	Write detections for process injection indicators using Windows Event Logs. Focus on suspicious process relationships, such as processes injecting into unrelated or system processes.
7	T1036 Masquerading	P1	Short term (0–3 mo)	Not covered	Build detections for masquerading using Windows Event Logs. Alert on processes named like system binaries but running from non-standard paths, and on renamed system utilities.
8	T1133 External Remote Services	P2	Short term (0–3 mo)	Not covered	Write detections for external remote service access using Windows Event Logs. Alert on VPN or RDP access from new or unusual external sources, which is relevant to Healthcare environments.

#	Technique	Priority	Feasibility	State	Recommendation
9	T1071.001 Web Protocols	P2	Short term (0–3 mo)	Not covered	Build detections for suspicious web protocol usage using Windows Event Logs. Focus on beaconing patterns, rare user agents, and connections to known malicious infrastructure associated with FIN7 and Lazarus Group.
10	T1190 Exploit Public-Facing Application	P2	Short term (0–3 mo)	Not covered	Write detections for exploitation of public-facing applications using Windows Event Logs. Alert on web server error patterns, injection attempts, and post-exploitation activity following suspicious web requests.
11	T1566.002 Spearphishing Link	P2	Short term (0–3 mo)	Not covered	Build a detection for spearphishing link activity using Sysmon network telemetry. Alert on browser processes launching unusual child processes or making connections to newly registered or suspicious domains.
12	T1204.002 Malicious File	P2	Short term (0–3 mo)	Not covered	Write detections for malicious file execution using Windows Event Logs. Alert on user-executed files from download or email attachment paths, and on files with mismatched signatures or content types.
13	T1098 Account Manipulation	P2	Short term (0–3 mo)	Not covered	Build detections for account manipulation using Windows Event Logs. Alert on privilege escalation, group membership changes, and credential-related modifications that deviate from baseline patterns.
14	T1543.003 Windows Service	P2	Short term (0–3 mo)	Not covered	Write detections for Windows service creation or modification using Windows Event Logs. Alert on new services with unusual binary paths, services created by non-admin accounts, and services with names mimicking legitimate ones.
15	T1110 Brute Force	P2	Short term (0–3 mo)	Not covered	Build a brute force detection using Windows Event Logs. Alert on repeated failed authentication attempts from the same source, distributed password guessing, and lockout threshold patterns.
16	T1552.001 Credentials In Files	P2	Short term (0–3 mo)	Not covered	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
17	T1021.002 SMB/Windows Admin Shares	P2	Short term (0–3 mo)	Not covered	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
18	T1219 Remote Access Tools	P2	Short term (0–3 mo)	Not covered	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
19	T1136.001 Local Account	P3	Short term (0–3 mo)	Not covered	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
20	T1557 Adversary-in-the-Middle	P3	Short term (0–3 mo)	Not covered	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
21	T1046 Network Service Discovery	P3	Short term (0–3 mo)	Not covered	telemetry already onboarded (Sysmon covers network) — build the detection now
22	T1082 System Information Discovery	P3	Short term (0–3 mo)	Not covered	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
23	T1087.002 Domain Account	P3	Short term (0–3 mo)	Not covered	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
24	T1560.001 Archive via Utility	P3	Short term (0–3 mo)	Not covered	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now

Remediation roadmap

Short term (0–3 mo) — 789 item(s)

789 techniques are feasible to address now because the required telemetry is already onboarded. The bulk of near-term work involves writing detection rules against Windows Event Logs and other existing sources. This is where the organization should focus immediately to move coverage from near zero.

T1027 Obfuscated Files or Information	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1486 Data Encrypted for Impact	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1021.001 Remote Desktop Protocol	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T1059.003 Windows Command Shell	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1112 Modify Registry	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1055 Process Injection	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1036 Masquerading	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1133 External Remote Services	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T1071.001 Web Protocols	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now

T1190 Exploit Public-Facing Application	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1566.002 Spearphishing Link	telemetry already onboarded (Sysmon covers network) — build the detection now
T1204.002 Malicious File	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1098 Account Manipulation	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T1543.003 Windows Service	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1110 Brute Force	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T1552.001 Credentials In Files	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1021.002 SMB/Windows Admin Shares	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T1219 Remote Access Tools	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1136.001 Local Account	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1557 Adversary-in-the-Middle	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1046 Network Service Discovery	telemetry already onboarded (Sysmon covers network) — build the detection now
T1082 System Information Discovery	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1087.002 Domain Account	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1560.001 Archive via Utility	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1573 Encrypted Channel	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1041 Exfiltration Over C2 Channel	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0817 Drive-by Compromise	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0819 Exploit Public-Facing Application	telemetry already onboarded (Sysmon covers network) — build the detection now
T0822 External Remote Services	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T0847 Replication Through Removable Media	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0848 Rogue Master	telemetry already onboarded (Sysmon covers network) — build the detection now
T0860 Wireless Compromise	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T0862 Supply Chain Compromise	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now

T0864 Transient Cyber Asset	telemetry already onboarded (Sysmon covers network) — build the detection now
T0865 Spearphishing Attachment	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0866 Exploitation of Remote Services	telemetry already onboarded (Sysmon covers network) — build the detection now
T0883 Internet Accessible Device	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T0886 Remote Services	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1589 Gather Victim Identity Information	telemetry already onboarded (Sysmon covers network) — build the detection now
T1589.002 Email Addresses	telemetry already onboarded (Sysmon covers network) — build the detection now
T1595 Active Scanning	telemetry already onboarded (Sysmon covers network) — build the detection now
T1595.001 Scanning IP Blocks	telemetry already onboarded (Sysmon covers network) — build the detection now
T1595.002 Vulnerability Scanning	telemetry already onboarded (Sysmon covers network) — build the detection now
T1595.003 Wordlist Scanning	telemetry already onboarded (Sysmon covers network) — build the detection now
T1598 Phishing for Information	telemetry already onboarded (Sysmon covers network) — build the detection now
T1598.001 Spearphishing Service	telemetry already onboarded (Sysmon covers network) — build the detection now
T1598.002 Spearphishing Attachment	telemetry already onboarded (Sysmon covers network) — build the detection now
T1598.003 Spearphishing Link	telemetry already onboarded (Sysmon covers network) — build the detection now
T0807 Command-Line Interface	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0823 Graphical User Interface	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0834 Native API	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0853 Scripting	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0858 Change Operating Mode	telemetry already onboarded (Sysmon covers network) — build the detection now
T0863 User Execution	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0871 Execution through API	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0874 Hooking	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0895 Autorun Image	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now

T1583 Acquire Infrastructure	telemetry already onboarded (Sysmon covers network) — build the detection now
T1583.001 Domains	telemetry already onboarded (Sysmon covers network) — build the detection now
T1584 Compromise Infrastructure	telemetry already onboarded (Sysmon covers network) — build the detection now
T1584.001 Domains	telemetry already onboarded (Sysmon covers network) — build the detection now
T1584.002 DNS Server	telemetry already onboarded (Sysmon covers network) — build the detection now
T1585 Establish Accounts	telemetry already onboarded (Sysmon covers network) — build the detection now
T1585.001 Social Media Accounts	telemetry already onboarded (Sysmon covers network) — build the detection now
T1586 Compromise Accounts	telemetry already onboarded (Sysmon covers network) — build the detection now
T1586.001 Social Media Accounts	telemetry already onboarded (Sysmon covers network) — build the detection now
T1588 Obtain Capabilities	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T1588.004 Digital Certificates	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T0859 Valid Accounts	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T0873 Project File Infection	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0873.001 Siemens Project File Format	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T0889 Modify Program	telemetry already onboarded (Sysmon covers network) — build the detection now

T1219.002 Remote Desktop Software	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1219.003 Remote Access Hardware	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1568 Dynamic Resolution	telemetry already onboarded (Sysmon covers network) — build the detection now
T1568.001 Fast Flux DNS	telemetry already onboarded (Sysmon covers network) — build the detection now
T1568.002 Domain Generation Algorithms	telemetry already onboarded (Sysmon covers network) — build the detection now
T1568.003 DNS Calculation	telemetry already onboarded (Sysmon covers network) — build the detection now
T1571 Non-Standard Port	telemetry already onboarded (Sysmon covers network) — build the detection now
T1572 Protocol Tunneling	telemetry already onboarded (Sysmon covers network) — build the detection now
T1573.001 Symmetric Cryptography	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1573.002 Asymmetric Cryptography	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1665 Hide Infrastructure	telemetry already onboarded (Sysmon covers network) — build the detection now
T1011 Exfiltration Over Other Network Medium	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1011.001 Exfiltration Over Bluetooth	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now

T1020 Automated Exfiltration	telemetry already onboarded (Sysmon covers network) — build the detection now
T1020.001 Traffic Duplication	telemetry already onboarded (Sysmon covers network) — build the detection now
T1029 Scheduled Transfer	telemetry already onboarded (Sysmon covers network) — build the detection now
T1030 Data Transfer Size Limits	telemetry already onboarded (Sysmon covers network) — build the detection now
T1048 Exfiltration Over Alternative Protocol	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1048.001 Exfiltration Over Symmetric Encrypted Non-C2 Protocol	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1048.002 Exfiltration Over Asymmetric Encrypted Non-C2 Protocol	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1048.003 Exfiltration Over Unencrypted Non-C2 Protocol	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1052 Exfiltration Over Physical Medium	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1052.001 Exfiltration over USB	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1464 Network Denial of Service	telemetry already onboarded (Intune MDM logs covers mobile) — build the detection now
T1471 Data Encrypted for Impact	telemetry already onboarded (Intune MDM logs covers mobile) — build the detection now
T1537 Transfer Data to Cloud Account	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1567.001 Exfiltration to Code Repository	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1567.003 Exfiltration to Text Storage Sites	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1567.004 Exfiltration Over Webhook	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1582 SMS Control	telemetry already onboarded (Intune MDM logs covers mobile) — build the detection now
T1640 Account Access Removal	telemetry already onboarded (Intune MDM logs covers mobile) — build the detection now
T1641 Data Manipulation	telemetry already onboarded (Intune MDM logs covers mobile) — build the detection now
T1641.001 Transmitted Data Manipulation	telemetry already onboarded (Intune MDM logs covers mobile) — build the detection now
T1642 Endpoint Denial of Service	telemetry already onboarded (Intune MDM logs covers mobile) — build the detection now
T1643 Generate Traffic from Victim	telemetry already onboarded (Intune MDM logs covers mobile) — build the detection now
T1662 Data Destruction	telemetry already onboarded (Intune MDM logs covers mobile) — build the detection now
T1485 Data Destruction	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now

T1485.001 Lifecycle-Triggered Deletion	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1489 Service Stop	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1491 Defacement	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1491.001 Internal Defacement	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1491.002 External Defacement	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1495 Firmware Corruption	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1496 Resource Hijacking	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1496.001 Compute Hijacking	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1496.002 Bandwidth Hijacking	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1498 Network Denial of Service	telemetry already onboarded (Sysmon covers network) — build the detection now
T1498.001 Direct Network Flood	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1498.002 Reflection Amplification	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1499 Endpoint Denial of Service	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1499.001 OS Exhaustion Flood	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1499.002 Service Exhaustion Flood	telemetry already onboarded (Sysmon covers network) — build the detection now
T1499.003 Application Exhaustion Flood	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1499.004 Application or System Exploitation	telemetry already onboarded (AWS CloudTrail covers cloud) — build the detection now
T1529 System Shutdown/Reboot	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1531 Account Access Removal	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1561 Disk Wipe	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1561.001 Disk Content Wipe	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1561.002 Disk Structure Wipe	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1565 Data Manipulation	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1565.001 Stored Data Manipulation	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now

T1565.002 Transmitted Data Manipulation	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1565.003 Runtime Data Manipulation	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1657 Financial Theft	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1667 Email Bombing	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1566 Phishing	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1053 Scheduled Task/Job	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1547 Boot or Logon Autostart Execution	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1218 System Binary Proxy Execution	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1003 OS Credential Dumping	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T1558 Steal or Forge Kerberos Tickets	telemetry already onboarded (Windows Event Logs covers identity) — build the detection now
T1071 Application Layer Protocol	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now
T1567 Exfiltration Over Web Service	telemetry already onboarded (Windows Event Logs covers endpoint) — build the detection now

Mid term (3–9 mo) — 7 item(s)

7 techniques require additional configuration or tuning of existing tools before detection is possible. These should be scoped and resourced after the short-term backlog is addressed.

T1594 Search Victim-Owned Websites	onboard application telemetry from Proofpoint Email Security first, then build the detection
T1598.004 Spearphishing Voice	onboard application telemetry from Proofpoint Email Security first, then build the detection
T0821 Modify Controller Tasking	onboard application telemetry from Proofpoint Email Security first, then build the detection
T1566.004 Spearphishing Voice	onboard application telemetry from Proofpoint Email Security first, then build the detection
T0890 Exploitation for Privilege Escalation	onboard application telemetry from Proofpoint Email Security first, then build the detection
T0820 Exploitation for Evasion	onboard application telemetry from Proofpoint Email Security first, then build the detection
T1684.002 Email Spoofing	onboard application telemetry from Proofpoint Email Security first, then build the detection

Long term (9–18 mo) — 92 item(s)

92 techniques need new log sources, tooling, or engineering effort that is not currently in place. These represent the largest investment and should be planned as a multi-quarter initiative, prioritized by threat relevance to Healthcare.

T1589.001 Credentials	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering

T1650 Acquire Access	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T1683 Generate Content	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T1683.001 Written Content	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T1683.002 Audio-Visual Content	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering

T1628.003 Conceal Multimedia Files	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0877 I/O Image	requires a new telemetry capability (ot)
T1423 Network Service Scanning	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0835 Manipulate I/O Image	requires a new telemetry capability (ot)
T0813 Denial of Control	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0815 Denial of View	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0826 Loss of Availability	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0827 Loss of Control	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0828 Loss of Productivity and Revenue	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0829 Loss of View	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0831 Manipulation of Control	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0832 Manipulation of View	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0837 Loss of Protection	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0879 Damage to Property	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0880 Loss of Safety	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T0882 Theft of Operational Information	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T1639 Exfiltration Over Alternative Protocol	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T1639.001 Exfiltration Over Unencrypted Non-C2 Protocol	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering
T1646 Exfiltration Over C2 Channel	ATT&CK lists no standard telemetry for this technique — needs bespoke detection engineering

Assumptions

- asset entries not mapped to ATT&CK platforms (ignored for platform filtering): Mainframe z/OS
- Use Cases:16: tag 'T1562.001' is revoked in ATT&CK v19.1 — remapped to T1685
- Use Cases:17: tag 'T9999' is not a valid ATT&CK v19.1 technique
- Use Cases:18: tag 'T1026' resolves to a technique deprecated in ATT&CK v19.1 — not counted
- 10 rules matched deterministically by ATT&CK technique or attacker-tool name (no AI involved); 5 sent to AI tagging
- 4 rules were AI-tagged (confidence ≥ 0.4) — model-generated mappings, spot-check before operational use
- 1 rules remain unmapped to ATT&CK — they do not count toward coverage
- detected columns: description → col 4, enabled → col 6, log_source → col 5, logic → col 3, name → col 1, tags → col 2
- gap ranking prioritizes techniques associated with your declared threat profile: Healthcare, FIN7, Lazarus Group
- narrative text was AI-generated — all numbers come from computed results

Not-applicable appendix (47)

These techniques leave the coverage denominator — the headline percentage makes no claim about them.

Platform not in the environment (9)

Technique	Matrix	Reason
T1059.012	Enterprise	targets ESXi; ESXi not in asset inventory
T1213.001	Enterprise	targets SaaS; SaaS not in asset inventory
T1213.003	Enterprise	targets SaaS; SaaS not in asset inventory
T1213.004	Enterprise	targets SaaS; SaaS not in asset inventory
T1496.003	Enterprise	targets SaaS; SaaS not in asset inventory
T1496.004	Enterprise	targets SaaS; SaaS not in asset inventory
T1505.006	Enterprise	targets ESXi; ESXi not in asset inventory
T1675	Enterprise	targets ESXi; ESXi not in asset inventory
T1677	Enterprise	targets SaaS; SaaS not in asset inventory

Deprecated by MITRE (37)

Technique	Matrix	Reason
T1026	Enterprise	deprecated in ATT&CK v19.1
T1034	Enterprise	deprecated in ATT&CK v19.1
T1043	Enterprise	deprecated in ATT&CK v19.1
T1051	Enterprise	deprecated in ATT&CK v19.1
T1053.004	Enterprise	deprecated in ATT&CK v19.1
T1061	Enterprise	deprecated in ATT&CK v19.1
T1062	Enterprise	deprecated in ATT&CK v19.1
T1064	Enterprise	deprecated in ATT&CK v19.1
T1108	Enterprise	deprecated in ATT&CK v19.1
T1149	Enterprise	deprecated in ATT&CK v19.1
T1153	Enterprise	deprecated in ATT&CK v19.1
T1175	Enterprise	deprecated in ATT&CK v19.1
T0808	ICS / OT	deprecated in ATT&CK v19.1
T0810	ICS / OT	deprecated in ATT&CK v19.1
T0818	ICS / OT	deprecated in ATT&CK v19.1
T0824	ICS / OT	deprecated in ATT&CK v19.1
